always at your side

 always at your side

The P-touch 3600 from Brother is an excellent stand alone or PC and Macintosh compatible Electronic labelling machine.

With all the best P-touch printing functions it's the ideal machine to meet your labelling requirements.

Special features include the new multi-function cutter which is capable of printing labels consecutively - giving a string of labels that is half-cut and ready to peel easily.

Additionally, the new rotate and print function turns your information through 90° and repeats it to your pre-set label length.

With a print speed of 20mm per second and a print resolution of 360dpi, the P-touch 3600 produces excellent quality professional labels, helping you achieve a better organised working environment.

Ease of use

The navigation dial enables you to access all the software functions of the P-touch 3600 logically and quickly. The printing capability includes 10 in-built fonts, 7 print styles, and 24 print sizes (plus Auto). The large semi-graphical LCD display allows you to preview up to 20 characters on 3 lines. It also lets you preview the options for font, size, width, style, frames, alignment, margins & length and the new rotate & print function.

• Multi function cutter

The additional bonus of the P-touch 3600 cutter is that it can repeatedly half cut successively printed labels leaving one string of repeat-printed labels half-cut and ready to peel one after the other.

• Navigation dial

Provides ease of use and lets you access the main functions and editable features such as font, styles and sizes quickly.

• LCD Display

The large semi-graphical display provides on screen previews for font, size, width, style, frames, alignment, margins & length and NEW rotate print function - allowing you to view the different components of your label before you decide to print.

• USB connection

For ease of use the USB port offers time saving links for PC connection.

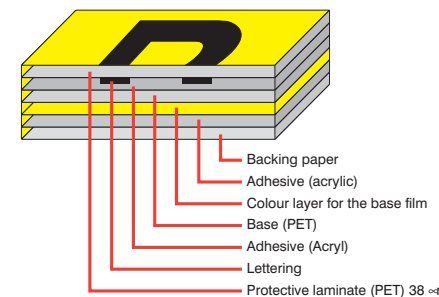

Professional labelling made easy

Durable Labelling

Brother's unique, patented TZ tapes are designed to be extra hard wearing. Tests have shown that they can withstand heavy abrasion, electrical resistance and lengthy exposure to chemicals, sunlight, water and extreme temperatures.

Brother laminated tapes consist of six layers of materials, resulting in a thin, extremely strong label. Characters formed with thermal transfer ink are actually printed onto the underside of the laminate. Sandwiched between two layers of PET (polyester film) this lets you create characters that are virtually indestructible.

Tapes for use with the P-touch 3600 model include 6 widths of tape in 22 colour combinations, helping you create professional self-adhesive labels and solving all your labelling requirements.

N.B Not all tape colours are available in all countries.

P-touch 3600 Special Features

- Multi-function cutter
- Rotate & print function
- Large semi-graphical LCD display
- USB connection (V1.1)

Printing capability

- 10 built-in fonts
- 24 (+ auto) print sizes
- 18 print styles
- 449 symbols and clip arts
- 9 barcode types
- 27mm print height
- Prints on up to 16 lines (36mm tape)
- 20mm/sec. print speed
- 360dpi printing
- 10240 character memory (Max.100 Files)
- 30 frames and fill patterns
- Block function used for tabs
- Horizontal and vertical alignment
- Mirror, vertical and rotate printing
- Copy printing & numbering function
- Currency converter
- Auto power off
- LCD contrast setting

PC Software

- Supplied with P-touch Editor, enabling you to use additional graphic images & features, plus all of the fonts already installed in your computer.

Label options

- Options include standard laminated tape including fluorescent and transparent. Specialist tapes include Non-laminated, Matt, strong adhesive and security tape. All are available in varying widths, and tape colour options.
- Tape widths of 6,9,12,18, 24 and 36mm
